COMPOST ECO TOILET HIRE

UK Loos design and build market leading Compost Toilets from our UK based manufacturing facility, here are a few images of our latest design which has taken the Eco Toilet and Compost Toilet market by storm.

Water-saving: Compost toilets do not require any water for flushing, saving a significant amount of water compared to flush toilets. This makes them ideal for areas with water scarcity or off-grid locations.

Odour control: Compost toilets have mechanisms like ventilation systems and composting materials (such as sawdust) to control and minimize odours. Proper maintenance and regular addition of dry materials help in preventing any unpleasant odours.

Human waste decomposition: Compost toilets use natural biological processes to decompose solid waste. They typically have two compartments or chambers, with one for receiving fresh waste and the other for composting the waste over time. Microorganisms break down the waste into nutrient-rich compost.

UK Loos.com
PART OF THE WILLPOWER GROUP

Our accessible compost toilet has been designed with ample space for a wheelchair to be able to access the unit with a short ramp.

The unit is designed to sit low to the ground ensuring there isn't a long steep ramp.

Grab rails have been fitted to the walls to assist with manoeuvrability. The floor is a non slip floor along with an outward opening door with a low level grab rail.

The toilet has been designed to match the height of an accessible toilet. A low level hand gel sanitiser has been fitted to the wall.

The unit has an external urine separator tank to assist with the composting process of a composting toilet.

PORTABLE TOILET HIRE UNITS

UK Loos.com
PART OF THE WILLPOWER GROUP

We operate a fleet of 800+ portable toilets. These units are ideal when value for money and portability are the key factors. We deliver, setup and remove at the end of your event, 7 days a week.

All the units in this portable range are dark green in colour and supplied with a foot pump flush and hand gel sanitiser to maintain high levels of hygiene for users.

These single units are always supplied to the highest standards, despite being the entry level option. They are fully self-contained and only require a level surface which can be grass or hard standing.

UK Loos.com
PART OF THE WILLPOWER GROUP

THE SIX MAN URINAL HIRE

This enclosed urinal unit includes 6 urinals.

A fully self-contained unit that can be sited on level ground should it be hard standing or grass. It has an open doorway that is usually positioned facing away from the crowd for privacy but ensures a quick turnaround.

These units help reduce pressure on the single toilets especially at the larger events when alcohol is served.

Festival Fence-Mounted Urinal Troughs — Efficient, Hygienic, Scalable

Introducing our **Heras-fence-mounted urinal trough systems**, engineered specifically for the demands of large-scale events, festivals, and high-footfall venues. These modular troughs are designed to be easily attached to standard temporary fencing (Heras-style panels), giving you a turnkey solution for crowd flow, hygiene, and space efficiency.

Why Choose Our Fence-Hung Trough Urinals?

- **Optimised for crowds** — Each trough accommodates multiple users at once, reducing queues and bottlenecks in high-traffic areas.
- **Space-saving design** — Mounts directly to fence panels, no need for standalone structures or extra floor footprint.
- **Rapid installation & teardown** — Pre-engineered mounting brackets allow fast, tool-free installation and removal.
- **Robust & durable** — Crafted from high-grade materials (e.g. food-safe polypropylene) to withstand heavy use, weather, and cleaning regimes.
- **Efficient drainage & plumbing** — Built-in outlet ports allow connection to waste tanks or mains drainage, with optional overflow protection.
- **Low maintenance & easy cleaning** — Smooth surfaces, minimal joints, and modular sections make maintenance during events quick and hygienic.
- **Scalable & modular** — Add multiple trough units along fence lines to match crowd density and event size.

CLASSIC ACCESSIBLE TOILET

We operate a fleet of 70+ accessible toilets. Our standard accessible toilet units are all built with the same high quality and strength as the smaller single units, but these include a much larger entrance and floor space to enable access for wheelchairs or restricted users.

We also supply accessible units with baby changing facilities.

They are completely portable and can be located anywhere with level ground should it be hard standing or grass.

Available with a full-on site attendant service / tanker if required for large scale events.

They are fully self-contained, they include full width grab rails on all 3 walls and a low level hand sanitiser to maintain high levels of hygiene. Includes roll-in ground level floor access. It's a self-contained unit that doesn't require a mains water or drainage connection.

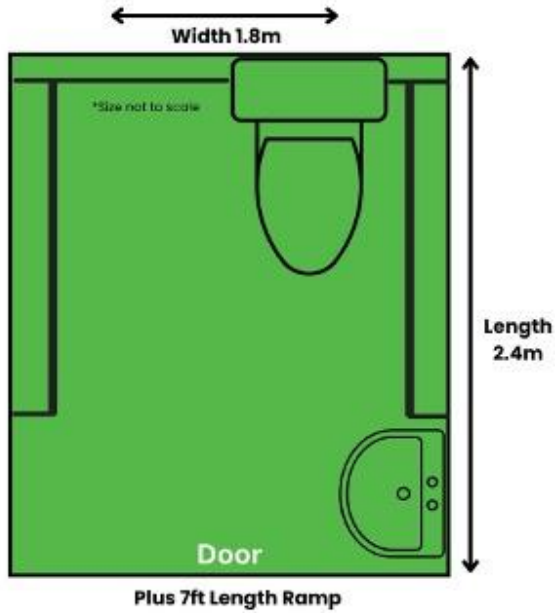
LUXURY ACCESSIBLE TOILET



An accessible toilet, known as a DDA-compliant or wheelchair-accessible toilet, is designed specifically to accommodate individuals with disabilities. These toilets are equipped with features and specifications that ensure ease of use and accessibility for people with mobility challenges. Here are some key features of an accessible toilet:

Our luxury accessible toilets have a wider entrance to accommodate wheelchairs and mobility aids.

Inside the accessible toilet there is sufficient space for manoeuvring a wheelchair or mobility device comfortably.
Grab bars are installed near the toilet to provide support and stability for individuals with mobility challenges.
The toilet seat in an accessible position to make transfer from a wheelchair easier.

Accessible toilet features include, lowered sink, easy-to-reach soap dispensers, and hand towels.

Our accessible toilets are identified by the International Symbol of Accessibility, which is a wheelchair symbol displayed on the door to indicate that it is designed for individuals with disabilities.

LUXURY ACCESSIBLE SHOWER POD

UK Loos.com
PART OF THE WILLPOWER GROUP

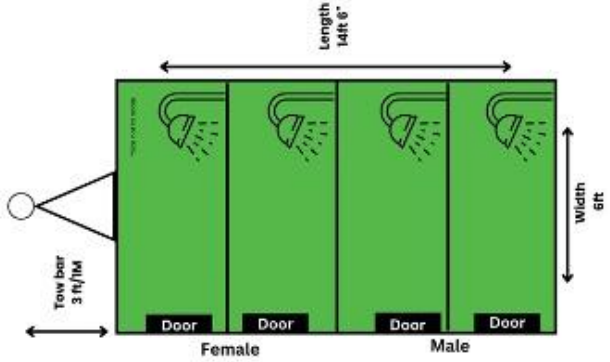
If your outdoor event needs to offer accessible shower facilities to your event attendees, then UK Loos can help. We're here to make sure you don't disappoint your event guests or attendees with low-grade shower facilities.

And what's more, we've been specialising in top-quality shower hire for over a decade now.

These units meet all the requirements for disabled access, low to the ground with an easy access ramp and internal they offer a complete range of facilities that deliver the perfect showering experience for users. Each shower pod internally has a large spacious area for showering, drying and dressing and is in the style of a wet room shower room which makes the whole showering experience a breeze.

We also offer a range of accessible portable event toilets to complement our accessible shower range, please ask for details.

The accessible shower pods need to be connected to a 22mm mains water supply and access to a 13amp/16amp supply or a generator, drainage connection, along with a 19kg gas which we supply.

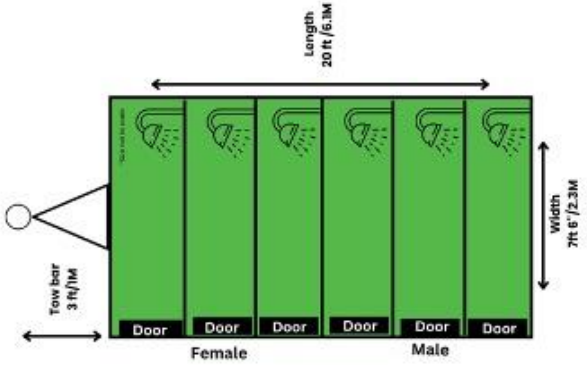


4 Bay Shower Trailer

Ideal for large events.

Our four bay shower unit contains four individual shower rooms with ample lighting. The ceiling, walls, and floors are clean and practical.

Shower trailers require a 22mm water feed; a drainage connection; gas supply; and access to a 13/16amp power socket.

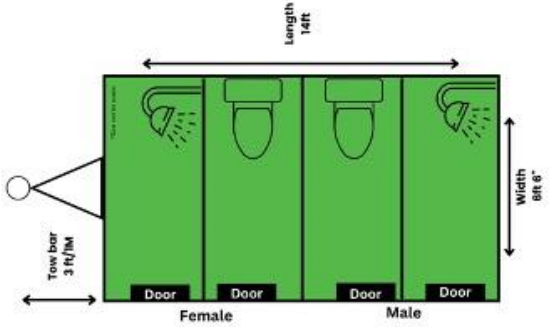


6 Bay Shower Trailer

Ideal for much larger events requiring a quick turnaround.

Each cubicle forms two areas, a showering area and a changing area.

Shower trailers require a 22mm water feed; a drainage connection; gas supply; and access to a 13/16amp power socket.



Combined luxury toilet and shower trailer

This unit includes 4 individual cubicles. 2 separate shower cubicles each with shower area, changing area, clothes hooks and 2 separate toilet cubicles with WC, hand basin and hot water.

Self-contained unit for the WCs but mains water and drainage required for the showers.

Runs off 13amp or 16amp power socket and requires 1x 47Kg gas bottle for showers.

UK LOOS TANKER SOLUTIONS

Our sewage tankers range from 500 gallons for restricted site access to 3000 or 4000 gallon lorries for larger waste removal needs. We also operate a JCB Fastrac and 3000 gallon tanker for muddy event sites or off road septic tank locations.

We offer:
Septic tank and cesspit tank emptying.
Site toilet and festival toilet emptying/servicing.
Septic tank homebuyers surveys

All of our waste is disposed of at the relevant sewage works and waste transfer notes are provided for all loads that we remove.
